DETAILED ACTION

Claim Objections

1. Claims 2-5 and 9-12 objected to because of the following informalities:
 - a. In claim 2, line 5, the phrase “the same” is suggested to be changed to “the oscillator”.
 - b. In claim 3, line 2 (page 15), the phrase “the same” is suggested to be changed to “the oscillator”.
 - c. In claim 4, line 5, the phrase “second communication system” is suggested to be changed to “first communication system”.
 - d. In claim 5, line 4, the phrase “second communication system” is suggested to be changed to “first communication system”.
 - e. In claim 9, line 4, the phrase “the same” is suggested to be changed to “the oscillator”.
 - f. In claim 10, line 2, the phrase “signals second communication” is suggested to be changed to “signals of the second communication”.
 - g. In claim 10, line 4, the phrase “the same” is suggested to be changed to “the oscillator”.
 - h. In claim 11, line 5, the phrase “second communication system” is suggested to be changed to “first communication system”.

Art Unit: 2611

i. In claim 12, line 2 (page 17), the phrase “second communication system” is suggested to be changed to “first communication system”.

Appropriate correction is required.

2. Claims 6, 7, 13, and 19-24 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim *cannot depend from any other multiple dependent claim*. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 26 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim.

Allowable Subject Matter

5. Claims 1-25 are allowable over prior art references (if above objections are overcome) because related references do not disclose tuning a receiver (oscillator) between first and second communication systems, wherein corrections are made when tuning back and forth between the

Art Unit: 2611

systems, wherein the corrections are based on tuning changes and the duration of the tuning changes.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cowley (US 2002/0122140) and Schittko et al. (U. S. Patent No. 4, 112, 375) disclose tuning a receiver (oscillator) between difference communication systems/channels.
